

# T&S WaterWatch™

## A whole new way to monitor water consumption and protect your facility.

Imagine knowing when a faucet or fixture begins to leak — or getting an alert when a catastrophic water failure occurs. Not only is this kind of real-time information critical for protecting your facility, it's also the key to managing your overall water usage and saving money in the long run.

Introducing T&S WaterWatch: it's a true foodservice first — giving operators a cost-effective solution for monitoring water consumption, detecting leaks and optimizing conservation measures.

## HOW DOES T&S WATERWATCH WORK?

T&S WaterWatch uses a non-invasive smartphone-sized device that **attaches to your facility's main water line**. By listening to the unique sound signatures of the water flow, T&S WaterWatch collects thousands of measurements every second from the pipe and translates those measurements to accurate water insights — **identifying exactly which fixtures are using water** and for how long. T&S WaterWatch can even distinguish between simultaneous water use events.

All it takes is a 7-day learning period, **using your facility's WiFi connection**, for T&S WaterWatch to provide daily consumption updates and real-time leak detection. **Using special algorithms** and machine learning, T&S WaterWatch identifies abnormal usage and **sends alerts** to immediately notify operators of major leaks so that corrective action can be taken. Reports are easily accessible using a mobile app or PC and provide information on smaller potential leak events and a more comprehensive understanding of your facility's overall water usage.

# HOW DOES T&S WATERWATCH HELP YOU USE WATER SMARTER?

Receive immediate notification of leaks and burst pipes

**Save thousands in potential damage and lost revenue**

Know exactly where your water is going

**Review data and reporting detailing water usage by fixture**

Compare historical and current data

**Easily determine if water conservation efforts are working**

Pinpoint opportunities for improvement

**Compare water usage within a certain region or across your entire chain**

Analyze data and identify water-saving opportunities

**Take advantage of T&S' deep industry experience, working together — all at no extra charge**

To learn more about how T&S WaterWatch can help your facility save water and reduce costs, call Customer Support at **1-800-479-9642** or visit [tsbrass.com/waterwatch](http://tsbrass.com/waterwatch) today.

## IT'S EASY TO GET STARTED.

- 1 Simply purchase and register your device
- 2 Connect it to WiFi
- 3 Attach it to your facility's main water line and plug it in to your nearest power outlet

*There's no cutting and no plumber required!*

## ACCESS YOUR DATA QUICKLY THROUGH AN EASY-TO-USE APP.

All water data collected by T&S WaterWatch is available via the app — whether you have one facility or multiple locations to monitor. The app makes it easy to filter and organize your data by a number of categories, including average usage, usage by source, specific dates or dayparts and more.
